# INDEX OF SUBJECTS AND AUTHORS

Active principle of tuberculin, The chemical composition of the. IX. The fractional heat coagulation of the protein of tuberculin, 394

—— —— —— ——, The isolation in crystalline form and identification of the, 402

—— pulmonary tuberculosis, The progression of lesions in, 506

ANDERSON, H. B. Concerning the tuberculous nature of pleurisy from the life insurance standpoint, 147

Animals, lower, pulmonary tuberculosis in, Some observations on the development of, as compared and contrasted with similar lesions in man, 435

Anterior mediastinal lymph nodes, Tuberculosis of the, 583

Antigen, tubercle-bacillus, nonprotein, Further studies on a, 86

Artificial pneumothorax at the Loomis Sanatorium over fourteen years, 348

Avian tubercle bacilli, human and, in the liver of birds, The fate of, 192

Bacilli, leprosy, The reactions of the white blood cells of the rabbit following inoculation with, 522

——, smegma, The reactions of the white blood cells of the rabbit following inoculation with, 537

——, tubercle, cultivation of, within diffusion membranes in vitro and in vivo, The, 422

——, ——, human and avian, in the liver of birds, The fate of, 192

——, ——, isolation of, The, from septic material, 47

——, ——, of low virulence, The local immunization of guinea pigs against tuberculosis by intracutaneous infection with, 93

——, ——, Some chemical changes accompanying the growth of, on Long's synthetic medium, 508

Bacillus, tubercle, filterability of, The, 77

——, ——, granules of, The, 53

BAUM, FELIX, AND SIMON, SALING. Electrocardiographic studies in pulmonary tuberculosis, 159

Birds, The fate of human and avian tubercle bacilli in the liver of, 192

BLANCE, CLARKE, AND LIVESAY, HARVEY R. A home-made preparation of iodized oil for opaque injections of tuberculous sinuses, 481

Blood cells, white, of the rabbit, The reactions of the, following inoculation with leprosy bacilli, 522

—— ——, ——, —— —— ——, —— —— —— ——, —— —— —— smegma bacilli, 537

BRITTON, JAMES A. Hospitalization for the tuberculous, 42

Bronchoscopic and surgical treatments of pulmonary suppuration, The, 33

BROWN, LAWRASON, AND HEISE, FRED H. The diagnostic and prognostic significance of pleurisy in pulmonary tuberculosis, 500

BRUTSAERT, PAUL, AND WILLIS, HENRY STUART. Tumor-like structures in the lungs of guinea pigs artificially exposed to silica dust, 268

BUCKLEY, RICHARD C. Tuberculosis of the anterior mediastinal lymph nodes, 583

BULLOCK, E. S. Light in the treatment of tuberculosis, 375

Cavity, Physical signs over, in pulmonary tuberculosis, 22

CHADWICK, HENRY D. The X-ray and clinical diagnosis of tuberculosis in children, 318

CHAPMAN, EDWARD N. Errors of omission and commission in the diagnosis of pulmonary tuberculosis, 307

Chemical changes accompanying the growth of tubercle bacilli on Long's synthetic medium, Some, 508

Chemical composition of the active principle of tuberculin, The. IX. The fractional heat coagulation of the protein of tuberculin, 394

——— ——— ——— ——— ——— ———, ———. X. The isolation in crystalline form and identification of the active principle of tuberculin, 402

Chest, routine fluoroscopic examinations of the, among industrial employees, The value of, 201

Children, tuberculosis in, diagnosis of, The X-ray and clinical, 318

Cholesterol content of sputum, A note on the, 430

Chronic pulmonary tuberculosis, A pathological study of the X-ray shadows of, 331

Clinical diagnosis of tuberculosis in children, The X-ray and, 318

Coagulation, heat, fractional, of the protein of tuberculin, The, 394

Concepts in the pathology of tuberculosis, Modern, 601

Crystalline form, The isolation in, and identification of the active principle of tuberculin, 402

Cultivation of tubercle bacilli within diffusion membranes in vitro and in vivo, The, 422

Cunningham, R. S., and Schwartz, Leo, Jr. Studies on acid-fast microörganisms. II. The reactions of the white blood cells of the rabbit following inoculation with smegma bacilli, 537

———, ———. ———.,——— Tompkins, Edna H. The white blood cells in human tuberculosis as studied by the supravital technique, 204

———, ———. ———. Tissue reaction in tuberculosis, 586

Cutaneous hypersensitiveness to tuberculin, The waning of, and the relation of tuberculoimmunity to tuberculoallergy, 240

Death-rates for tuberculosis in New York State in 1926, Recorded and resident, 634

De Porte, J. V. Recorded and resident death-rates for tuberculosis in New York State in 1926, 634

Derby, Arthur P., and Dunham, Kennon. Physical signs over cavity in pulmonary tuberculosis, 22

Development of pulmonary tuberculosis in lower animals as compared and contrasted with similar lesions in man, Some observations on the, 435

Diagnosis of pulmonary tuberculosis, Errors of omission and commission in the, 307

——— ——— ——— ———, Râles in the, 326

——— ——— tuberculosis by means of the hamster, The, 279

——— ——— ——— in children, The X-ray and clinical, 318

Diagnostic and prognostic significance of pleurisy in pulmonary tuberculosis, The, 500

Diffusion membranes, The cultivation of tubercle bacilli within, in vitro and in vivo, 422

Dunham, Kennon, and Derby, Arthur P. Physical signs over cavity in pulmonary tuberculosis, 22

Dust, silica, The pulmonary effect of over three years' exposure of guinea pigs to, 253

———, ———, Tumor-like structures in the lungs of guinea pigs artificially exposed to, 268

Early infancy, Tuberculous infection of the lung in, 565

Eggs, radiated, feeding, to tuberculosis patients, The lipoid phosphorus-cholesterol ratio before and after, 520

Electrocardiographic studies in pulmonary tuberculosis, 159

Employees, industrial, routine fluoroscopic examinations of the chest among, The value of, 201

Errors of omission and commission in the diagnosis of pulmonary tuberculosis, 307

Evanoff, Max, and Sweany, H. C. The isolation of tubercle bacilli from septic material, 47

Examinations, routine fluoroscopic, of the chest among industrial employees, The value of, 201

Exposure of guinea pigs to silica dust, The pulmonary effect of over three years', 253
Exudative and productive processes in pleural tuberculous infection, A note on, 627

Factors fundamental to healing in tuberculosis, 459
Feeding radiated eggs to tuberculosis patients, The lipoid phosphorus-cholesterol ratio before and after, 520
FELLOWS, H. H., AND ORDWAY, W. H. The value of routine fluoroscopic examinations of the chest among industrial employees, 201
Filterability of the tubercle bacillus, The, 77
FISHBERG, MAURICE. Infraclavicular tuberculous infiltrations, 1
Fluoroscopic examinations of the chest among industrial employees, The value of routine, 201
Food problem in a sanatorium, The, 557
FOX, HERBERT. Some observations on the development of pulmonary tuberculosis in lower animals as compared and contrasted with similar lesions in man, 435
Fractional heat coagulation of the protein of tuberculin, The, 394
Further studies on a nonprotein tubercle-bacillus antigen, 86

GRAHAM, EVARTS A. The bronchoscopic and surgical treatments of pulmonary tuberculosis, 33
Granules of the tubercle bacillus, The, 53
Growth of tubercle bacilli, Some chemical changes accompanying the, on Long's synthetic medium, 508
Guinea pigs, local immunization of, The, against tuberculosis by intracutaneous infection with tubercle bacilli of low virulence, 93
—— ——, over three years' exposure of, to silica dust, The pulmonary effect of, 253
—— ——, Tumor-like structures in the lungs of, artificially exposed to silica dust, 268

Hamster, The diagnosis of tuberculosis by means of the, 279
Healing in tuberculosis, Factors fundamental to, 459
Heat coagulation, fractional, of the protein of tuberculin, The, 394
HEGNER, CASPER F. Surgical rest in pulmonary tuberculosis, 282
HEISE, FRED H. Râles in the diagnosis of pulmonary tuberculosis, 326
——, —— ——. Râles in the prognosis of pulmonary tuberculosis, 329
——, —— ——. The progression of lesions in active pulmonary tuberculosis, 506
——, —— ——., AND BROWN, LAWRASON. The diagnostic and prognostic significance of pleurisy in pulmonary tuberculosis, 500
Hernia of the lung, 182
HILL, ALICE M. A statistical study of the relationship between pregnancy and tuberculosis, 113
Home-made preparation of iodized oil for opaque injections of tuberculous sinuses, A, 481
Hospitalization for the tuberculous, 42
HOU, P. C. The cultivation of tubercle bacilli within diffusion membranes in vitro and in vivo, 422
Human and avian tubercle bacilli in the liver of birds, The fate of, 192
—— tuberculosis, white blood cells in, The, as studied by the supravital technique, 204
Hypersensitiveness to tuberculin, cutaneous, The waning of, and the relation of tuberculoimmunity to tuberculoallergy, 240

Identification of the active principle of tuberculin, The isolation in crystalline form and, 402
Immunization, local, of guinea pigs against tuberculosis by intracutaneous infection with tubercle bacilli of low virulence, The, 93
Industrial employees, routine fluoroscopic examinations of the chest among, The value of, 201
Infancy, early, Tuberculous infection of the lung in, 565

Infection, intracutaneous, with tubercle bacilli of low virulence, The local immunization of guinea pigs against tuberculosis by, 93
——, Tuberculous, of the lung in early infancy, 565
——, ——, pleural, exudative and productive processes in, A note on, 627
Infiltrations, tuberculous, Infraclavicular, 1
Infraclavicular tuberculous infiltrations, 1
INGVALDSON, THORSTEN, AND MCRAE, DUNCAN F. The lipoid phosphorus-cholesterol ratio before and after feeding radiated eggs to tuberculosis patients, 520
Injections, opaque, of tuberculous sinuses, iodized oil for, A home-made preparation of, 481
Innate resistance to tuberculosis, 103
Insurance, life, standpoint, tuberculous nature of pleurisy from the, Concerning the, 147
Intracutaneous infection with tubercle bacilli of low virulence, The local immunization of guinea pigs against tuberculosis by, 93
Intrathoracic conditions, Nontuberculous, 489
—— tuberculous lymphoma, 574
Iodized oil, A home-made preparation of, for opaque injections of tuberculous sinuses, 481
Isolation in crystalline form and identification of the active principle of tuberculin, The, 402
—— of tubercle bacilli from septic material, The, 47

JOHNSON, TREAT B., AND RENFREW, ALICE G. Some chemical changes accompanying the growth of tubercle bacilli on Long's synthetic medium, 508
JOHNSTONE, BEN. I., AND SMITH, F. JANNEY. Hernia of the lung, 182
JONES, EDGAR, AND TIRRILL, W. O., JR. Studies on acid-fast microörganisms. I. The reactions of the white blood cells of the rabbit following inoculation with leprosy bacilli, 522

KELLY, RUBY GREEN, AND PINNER, MAX. A note on the cholesterol content of sputum, 430
KOHN, JEROME L. Tuberculous infection of the lung in early infancy, 565
KORNS, JOHN H., AND LU, GEORGE Y. C. The diagnosis of tuberculosis by means of the hamster, 279

Leprosy bacilli, The reactions of the white blood cells of the rabbit following inoculation with, 522
Life insurance standpoint, tuberculous nature of pleurisy from the, Concerning the, 147
Light in the treatment of tuberculosis, 375
Lipoid phosphorus-cholesterol ratio before and after feeding radiated eggs to tuberculosis patients, The, 520
Liver of birds, human and avian tubercle bacilli in the, The fate of, 192
LIVESAY, HARVEY R., AND BLANCE, CLARKE. A home-made preparation of iodized oil for opaque injections of tuberculous sinuses, 481
Local immunization of guinea pigs against tuberculosis by intracutaneous infection with tubercle bacilli of low virulence, The, 93
Long's synthetic medium, Some chemical changes accompanying the growth of tubercle bacilli on, 508
Loomis Sanatorium, Artificial pneumothorax at the, over fourteen years, 348
Low virulence, tubercle bacilli of, The local immunization of guinea pigs against tuberculosis by intracutaneous infection with, 93
Lower animals, pulmonary tuberculosis in, Some observations on the development of, as compared and contrasted with similar lesions in man, 435
LU, GEORGE Y. C., AND KORNS, JOHN H. The diagnosis of tuberculosis by means of the hamster, 279
Lung, Hernia of the, 182
——, Tuberculous infection of the, in early infancy, 565

Lungs, Tumor-like structures in the, of guinea pigs artificially exposed to silica dust, 268
Lymph nodes, mediastinal, anterior, Tuberculosis of the, 583
Lymphoma, tuberculous, Intrathoracic, 574

Man, Some observations on the development of pulmonary tuberculosis in lower animals as compared and contrasted with similiar lesions in, 435
MARIETTE, ERNEST S. The food problem in a sanatorium, 557
MAXEINER, STANLEY R. The surgical treatment of nontuberculous conditions of tuberculosis patients, 293
MCRAE, DUNCAN F., AND INGVALDSON, THORSTEN. The lipoid phosphorus-cholesterol ratio before and after feeding radiated eggs to tuberculosis patients, 520
Mediastinal lymph nodes, anterior, Tuberculosis of the, 583
Medium, Long's synthetic, Some chemical changes accompanying the growth of tubercle bacilli on, 508
Membranes, diffusion, The cultivation of tubercle bacilli within, in vitro and in vivo, 422
Mental attitude as a factor in the treatment of tuberculosis, 388
Modern concepts in the pathology of tuberculosis, 601

New York State, death-rates for tuberculosis in, in 1926, Recorded and resident, 634
Nonprotein tubercle-bacillus antigen, Further studies on a, 86
Nontuberculous conditions of tuberculosis patients, surgical treatment of, The, 293
—— intrathoracic conditions, 489
Note on exudative and productive processes in pleural tuberculous infection, A, 627
—— —— the cholesterol content of sputum, A, 430

Oil, iodized, A home-made preparation of, for opaque injections of tuberculous sinuses, 481
Opaque injections of tuberculous sinuses, iodized oil for, A home-made preparation of, 481
ORDWAY, W. H., AND FELLOWS, H. H. The value of routine fluoroscopic examinations of the chest among industrial employees, 201
ORNSTEIN, GEORGE G., AND STEINBACH, M. M. The local immunization of guinea pigs against tuberculosis by intracutaneous infection with tubercle bacilli of low virulence, 93

Pathological study of the X-ray shadows of chronic pulmonary tuberculosis, A, 331
Pathology of tuberculosis, Modern concepts in the, 601
Patients, tuberculosis, feeding radiated eggs to, The lipoid phosphorus-cholesterol ratio before and after, 520
——, ——, surgical treatment of nontuberculous conditions of, The, 293
PETERS, ANDREW. Artificial pneumothorax at the Loomis Sanatorium over fourteen years, 348
PETERSON, BLANCHE. Mental attitude as a factor in the treatment of tuberculosis, 388
Phosphorus-cholesterol ratio, The lipoid, before and after feeding radiated eggs to tuberculosis patients, 520
Physical signs over cavity in pulmonary tuberculosis, 22
PIERSON, PHILIP H. A pathological study of the X-ray shadows of chronic pulmonary tuberculosis, 331
PINNER, MAX. A note on exudative and productive processes in pleural tuberculous infection, 627
——, ——. Further studies on a nonprotein tubercle-bacillus antigen, 86
——, ——. Modern concepts in the pathology of tuberculosis, 601
——, ——., AND KELLY, RUBY GREEN. A note on the cholesterol content of sputum, 430
Pleural tuberculous infection, exudative and productive processes in, A note on, 627

Pleurisy, The diagnostic and prognostic significance of, in pulmonary tuberculosis, 500
——, tuberculous nature of, from the life insurance standpoint, Concerning the, 147
Pneumothorax, Artificial, at the Loomis Sanatorium over fourteen years, 348
POTTENGER, F. M. Factors fundamental to healing in tuberculosis, 459
Pregnancy and tuberculosis, relationship between, A statistical study of, 113
Principle, active, of tuberculin, The isolation in crystalline form and identification of the, 402
Problem, food, in a sanatorium, The, 557
Productive processes, exudative and, in pleural tuberculous infection, A note on, 627
Prognosis of pulmonary tuberculosis, Râles in the, 329
Prognostic significance of pleurisy in pulmonary tuberculosis, The diagnostic and, 500
Progression of lesions in active pulmonary tuberculosis, The, 506
Protein of tuberculin, The fractional heat coagulation of the, 394
Pulmonary effect of over three years' exposure of guinea pigs to silica dust, The, 253
—— tuberculosis, active, The progression of lesions in, 506
—— ——, cavity in, Physical signs over, 22
—— ——, chronic, A pathological study of the X-ray shadows of, 331
—— ——, diagnosis of, Errors of omission and commission in the, 307
—— ——, —— ——, Râles in the, 326
—— ——, Electrocardiographic studies in, 159
—— —— in lower animals as compared and contrasted with similar lesions in man, Some observations on the development of, 435
—— ——, pleurisy in, The diagnostic and prognostic significance of, 500
—— ——, prognosis of, Râles in the, 329
—— ——, Surgical rest in, 282
Pulmonary tuberculosis, treatments of, bronchoscopic and surgical, The, 33

Rabbit, white blood cells of the, The reactions of the, following inoculation with leprosy bacilli, 522
——, —— —— —— —— ——, —— —— —— ——, —— —— —— smegma bacilli, 537
Radiated eggs, feeding, to tuberculosis patients, The lipoid phosphorus-cholesterol ratio before and after, 520
Râles in the diagnosis of pulmonary tuberculosis, 326
—— —— —— prognosis of pulmonary tuberculosis, 329
Reaction, Tissue, in tuberculosis, 586
Reactions of the white blood cells of the rabbit following inoculation with leprosy bacilli, The, 522
—— —— —— —— —— —— —— —— —— —— —— —— smegma bacilli, The, 537
Recorded and resident death-rates for tuberculosis in New York State in 1926, 634
Relation of tuberculoimmunity to tuberculoallergy, The waning of cutaneous hypersensitiveness to tuberculin and the, 240
Relationship between pregnancy and tuberculosis, A statistical study of, 113
RENFREW, ALICE G., AND JOHNSON, TREAT B. Some chemical changes accompanying the growth of tubercle bacilli on Long's synthetic medium, 508
Resident death-rates, Recorded and, for tuberculosis in New York State in 1926, 634
Resistance to tuberculosis, Innate, 103
Rest, Surgical, in pulmonary tuberculosis, 282
ROGERS, JOHN C. The fate of human and avian tubercle bacilli in the liver of birds, 192
Routine fluoroscopic examinations of the chest among industrial employees, The value of, 201
RYDER, CHARLES T. Innate resistance to tuberculosis, 103

Sanatorium, food problem in a, The, 557
SANTE, L. R. Nontuberculous intrathoracic conditions, 489
SCHWARTZ, LEO, JR., AND CUNNINGHAM, R. S. Studies on acid-fast microörganisms. II. The reactions of the white blood cells of the rabbit following inoculation with smegma bacilli, 537
SEIBERT, FLORENCE B. The chemical composition of the active principle of tuberculin. IX. The fractional heat coagulation of the protein of tuberculin, 394
——, —— ——. —— —— —— —— —— —— —— —— ——. X. The isolation in crystalline form and the identification of the active principle of tuberculin, 402
Septic material, isolation of tubercle bacilli from, The, 47
Signs, Physical, over cavity in pulmonary tuberculosis, 22
Silica dust, The pulmonary effect of over three years' exposure of guinea pigs to, 253
—— ——, Tumor-like structures in the lungs of guinea pigs artificially exposed to, 268
SIMON, SALING, AND BAUM, FELIX. Electrocardiographic studies in pulmonary tuberculosis, 159
Sinuses, tuberculous, iodized oil for opaque injections of, A home-made preparation of, 481
Smegma bacilli, The reactions of the white blood cells of the rabbit following inoculation with, 537
SMITH, F. JANNEY, AND JOHNSTONE, BEN. I. Hernia of the lung, 182
Some observations on the development of pulmonary tuberculosis in lower animals as compared and contrasted with similar lesions in man, 435
Sputum, cholesterol content of, A note on the, 430
Statistical study of the relationship between pregnancy and tuberculosis, A, 113
STEINBACH, M. M., AND ORNSTEIN, GEORGE G. The local immunization of guinea pigs against tuberculosis by intracutaneous infection with tubercle bacilli of low virulence, 93
Studies, Electrocardiographic, in pulmonary tuberculosis, 159
—— on a nonprotein tubercle-bacillus antigen, Further, 86
—— —— acid-fast microörganisms. I. The reactions of the white blood cells of the rabbit following inoculation with leprosy bacilli, 522
—— —— —— —— ——. II. —— —— —— —— —— —— —— —— —— —— —— —— smegma bacilli, 537
Study of the relationship between pregnancy and tuberculosis, A statistical, 113
——, pathological, of the X-ray shadows of chronic pulmonary tuberculosis, A, 331
Supravital technique, The white blood cells in human tuberculosis as studied by the, 204
Surgical rest in pulmonary tuberculosis, 282
—— treatment of nontuberculous conditions of tuberculosis patients, The, 293
—— treatments of pulmonary tuberculosis, The bronchoscopic and, 33
SWEANY, H. C. The filterability of the tubercle bacillus, 77
——, ——. ——. The granules of the tubercle bacillus, 53
——, ——. ——., AND EVANOFF, MAX. The isolation of tubercle bacilli from septic material, 47
Synthetic medium, Long's, Some chemical changes accompanying the growth of tubercle bacilli on, 508

THORBURN, GRANT. The working capacity of the tuberculous, 297
TIRRILL, W. O., JR., AND JONES, EDGAR. Studies on acid-fast microörganisms. I. The reactions of the white blood cells of the rabbit following inoculation with leprosy bacilli, 522
Tissue reaction in tuberculosis, 586
TOMPKINS, EDNA H., AND CUNNINGHAM, R. S. The white blood cells in human tuberculosis as studied by the supravital technique, 204
Treatment of tuberculosis, Light in the, 375
—— —— ——, Mental attitude as a factor in the, 388

Treatment, surgical, of nontuberculous conditions of tuberculosis patients, The, 293
Treatments of pulmonary tuberculosis, bronchoscopic and surgical, The, 33
Tubercle bacilli, cultivation of, within diffusion membranes in vitro and in vivo, The, 422
—— ——, human and avian, in the liver of birds, The fate of, 192
—— ——, isolation of, The, from septic material, 47
—— —— of low virulence, The local immunization of guinea pigs against tuberculosis by intracutaneous infection with, 93
—— ——, Some chemical changes accompanying the growth of, on Long's synthetic medium, 508
Tubercle-bacillus antigen, nonprotein, Further studies on a, 86
Tubercle bacillus, filterability of, The, 77
—— ——, granules of, The, 53
Tuberculin, active principle of, The isolation in crystalline form and identification of the, 402
——, cutaneous hypersensitiveness to, The waning of, and the relation of tuberculoimmunity to tuberculoallergy, 240
——, The fractional heat coagulation of the protein of, 394
Tuberculoallergy, relation of tuberculoimmunity, The waning of cutaneous hypersensitiveness to tuberculin and the, 240
Tuberculoimmunity, relation of, to tuberculoallergy to, The waning of cutaneous hypersensitiveness to tuberculin and the, 240
Tuberculosis, death-rates for, in New York State in 1926, Recorded and resident, 634
——, diagnosis of, by means of the hamster The, 279
——, —— ——, in children, The X-ray and clinical, 318
——, healing in, Factors fundamental to, 459
——, human, white blood cells in, The, as studied by the supravital technique, 204
Tuberculosis, immunization of guinea pigs against, The local, by intracutaneous infection with tubercle bacilli of low virulence, 93
—— of the anterior mediastinal lymph nodes, 583
——, pathology of, Modern concepts in the, 601
—— patients, feeding radiated eggs to, The lipoid phosphorus-cholesterol ratio before and after, 520
—— ——, surgical treatment of nontuberculous conditions of, The, 293
——, pregnancy and, relationship between, A statistical study of, 113
——, pulmonary, active, The progression of lesions in, 506
——, ——, cavity in, Physical signs over, 22
——, ——, chronic, A pathological study of the X-ray shadows of, 331
——, ——, diagnosis of, Errors of omission and commission in the, 307
——, ——, —— ——, Râles in the, 326
——, ——, Electrocardiographic studies in, 159
——, ——, in lower animals as compared and contrasted with similar lesions in man, Some observations on the development of, 435
——, ——, pleurisy in, The diagnostic and prognostic significance of, 500
——, ——, prognosis of, Râles in the, 329
——, ——, Surgical rest in, 282
——, ——, treatments of, bronchoscopic and surgical, The, 33
——, resistance to, Innate, 103
——, Tissue reaction in, 586
——, treatment of, Light in the, 375
——, —— ——, Mental attitude as a factor in the, 388
Tuberculous, Hospitalization for the, 42
—— infection of the lung in early infancy, 565
—— ——, pleural, exudative and productive processes in, A note on, 627
—— infiltrations, Infraclavicular, 1
—— lymphoma, Intrathoracic, 574
—— nature of pleurisy from the life insurance standpoint, Concerning the, 147

Tuberculous sinuses, iodized oil for opaque injections of, A home-made preparation of, 481
——, The working capacity of the, 297
Tumor-like structures in the lungs of guinea pigs artificially exposed to silica dust, 268

Value of routine fluoroscopic examinations of the chest among industrial employees, The, 201
Virulence, low, tubercle bacilli of, The local immunization of guinea pigs against tuberculosis by intracutaneous infection with, 93

Waning of cutaneous hypersensitiveness to tuberculin, The, and the relation of tuberculoimmunity to tuberculoallergy, 240
WESSLER, H. Intrathoracic tuberculous lymphoma, 574
White blood cells in human tuberculosis as studied by the supravital technique, The, 204
White blood cells of the rabbit, The reactions of, following inoculation with leprosy bacilli, 522
—— —— —— —— —— ——, —— ——
——, —— —— —— smegma bacilli, 537
WILLIS, HENRY STUART. Studies on immunity to tuberculosis. The waning of cutaneous hypersensitiveness to tuberculin and the relation of tuberculoimmunity to tuberculoallergy, 240
——, —— ——. The pulmonary effect of over three years' exposure of guinea pigs to silica dust, 253
——, —— ——, AND BRUTSAERT, PAUL. Tumor-like structures in the lungs of guinea pigs artificially exposed to silica dust, 268
Working capacity of the tuberculous, The, 297

X-ray and clinical diagnosis of tuberculosis in children, The, 318
—— shadows of chronic pulmonary tuberculosis, A pathological study of the, 331
